Education

Software Engineering

2023 - 2027

FPT UNIVERSITY

2nd-year student (Sophomore)

Skills

- Frameworks: JSP/Servlet, Thymeleaf, Bootstrap, REST API
- Programming: Java, Spring Boot, SQL, HTML, CSS, JavaScript
- Tools: Git, IntelliJ IDEA, MySQL Workbench
- Concepts: OOP, MVC Architecture, Agile Development
- Interests: Big Data, AI Chatbot, IoT

Certifications

2025

AI Agents in Java with

Objective

A motivated sophomore majoring in Software Engineering at FPT University, seeking an internship opportunity to apply academic knowledge in software development, enhance programming skills, and gain practical experience in real-world projects.

Projects & Experience

Student Project: Job Recruitment Platform

08/2025 - 11/2025

A full-stack web platform connecting job seekers and employers.

Technologies: Spring Boot, MySQL, HTML/CSS, Bootstrap, Thymeleaf, REST API

- Contributed to building a **job recruitment web platform** that connects job seekers and employers.
- Implemented **payment module** for premium job postings and service subscriptions.
- Designed and optimized the **database** for users, job postings, applications, and payments.
- Developed **authentication and authorization** features (Spring Security).
- Assisted in **CRUD operations** for user profiles, job applications, and job postings.
- Designed **UI layouts** for user dashboards and job listing pages, ensuring a clean and intuitive interface.
- Collaborated in team-based development using Git and followed Agile workflow.

Student Project: Hotel Booking Website

04/2025 - 07/2025

A full-stack hotel booking platform for managing rooms and customers.

- **Technologies:** Java, JSP/Servlet, MySQL, Bootstrap, JavaScript, HTML/CSS
- Contributed to developing a full-stack hotel booking web application following the MVC model.
- Implemented **payment module** with QR code integration and status tracking.
- Designed and built the **AI Chatbox** that responds to user queries based on **real-time data from the database**.
- Responsible for **database schema design** and ensuring smooth data flow between rooms, bookings, and users.
- Designed the **frontend interface** for main pages (home, room listing, booking, and payment).
- Collaborated with teammates using Git and conducted testing to ensure system stability.

Activities

2025	Software Development Lifecycle
2022	IELTS – Intermediate (IELTS 5.5)

Volunteer & Community Projects*Various Organizations*

- Participated in multiple volunteer programs focused on community support, education, and environmental activities.
- Actively engaged in organizing charity events and school community projects.

Coding Competitions (Code Camp, Hackathon, etc.) 2023 - Present

FPT University & High School

- Joined several **Code Camp** and programming competitions from high school to university.
- Gained hands-on experience solving algorithmic and real-world software problems under time constraints.
- Collaborated with teammates to build small-scale applications during hackathons.
